Economic Review

The Indian economy has made strong progress backed by stable political results coming from the general elections outcome in May 2014 that supported business, investor, and consumer sentiment. Thereafter, a supportive global commodity price environment along with gradual improvement in governance resulted in increase in economic output. Led by the manufacturing, finance, and electricity sectors, the Government expects GDP growth for FY 2014-15 to come at 7.4% from 6.9% in FY 2013-14.

The Indian Economy in 2014-15 has emerged as one of the largest economies with a promising economic outlook on the back of controlled inflation, rise in domestic demand, increase in investments, decline in oil process, and reforms among others.

Indian economy's outlook for FY 2015-16 appears optimistic. Confluence of three critical factors – benign commodity price outlook, domestic monetary easing and policy support from the Government, is likely to help in improving the growth-inflation balance. International rating agency Moody's, upgraded India's sovereign outlook to positive from stable in April 2015.

Even though Capital Market continued with the upside momentum and the Benchmark indices i.e. BSE Sensex and Nifty Closed at high in comparison to their previous years closed during the year end under review, the Indian IPO market in Financial Year 2014-15 continued to its downward trend as compared to the previous years. Further data of credit off take also not encouraging resulting in sluggish growth.

However with the stable Government at the Centre and the expectations of consistent economic policies from the Government relating to taxes, Foreign Direct Investments and more economic reforms, and recent amendments by SEBI relating to timing and simplification of process to boost the sentiment of the capital market resulted in various Companies filing their offer document with SEBI.

State of Company Affairs

The above mentioned mixed economic and financial conditions resulted in stagnant Company's performance in both standalone and consolidated top and bottom line of the Company. Standalone Income from operations for the year under review was stagnant to Rs.2586.60 as against Rs.2674.28 lakhs, and also Consolidated Income from Operations was stagnant to Rs. 2882.32 as against Rs. 2999.35 lakhs. However, Net Profit after tax standalone was Rs.842.78 Lacs as compared to Loss of Rs.1241.13 lacs in the previous year (due to onetime exceptional item) and Consolidated Net Profit after tax was Rs.620.24 lacs as compared to Loss of Rs.2085.60 Lacs in the previous year.

No material changes and commitments have occurred after the close of the year till the date of this Report, which affect the financial position of the Company.

Share Capital

During the year under review, the Company has not issued any Equity Shares consequently, the Issued, Subscribed and Paid up Equity Share Capital remains Rs.1229.69 lakhs as at March 31st, 2015.

Dividend

During the year under review, the Board of Directors of the Company has decided to conserve resources, not to recommend the payment of any dividend for the year ended March 31st, 2015.

Subsidiary Companies

During the year under review, there was no change in status of existing six wholly owned domestic subsidiaries as compared to previous year. OUTLOOK

Global Factors

As per IMF estimates (World Economic Outlook, January 2015), World GDP growth remained unchanged at 3.3% in 2014. Global economic growth continued to remain uneven – while advanced economies like the US, Eurozone, and UK are expected to have gained traction in 2014, emerging economies like China, Russia, Brazil, etc. are expected to see a slowdown in their respective economies. Overall, it appears that the pace of economic recovery is getting marked by specificity. Two important financial market developments that stood out during 2014 was the appreciation of the US dollar and the sharp fall in global commodity prices.

Indian Economy

India's economy is poised to return to its high-growth path, thanks to lower fiscal and current account deficits, falling inflation, benign commodity prices, and structural reforms to boost investments. Monetary policy is also likely to be supportive with the Reserve Bank of India (RBI) having moved to flexible inflation targeting. The manufacturing sector is likely to benefit from lower interest rates. The share of investments in Gross Domestic Product (GDP) is at 29% (compared to 33% in 2007) and is expected to pick up. However, productivity and capital efficiency improvement are likely to drive near-term growth.

RISK AND CONCERN

At a global level, employment in the US remains quite volatile, and there are mixed signals with regards to whether the recovery is robust or not. In Japan, coordinated monetary and fiscal stimulus have been successful in bringing the economy out of a deflationary zone; but the recent sales tax hike poses some risks for the domestic demand. In Europe, although the economy is out of recession, deflationary risks are still been debated on. China is going through a rebalancing phase, where growth has dipped below its long-term average, though it still remains one of the fastest growing economies globally. Inflation in these economies, however, has undershot projections, on account of recent commodity price declines, and is also reflective of still large output gaps. All these international challenges do not mean the risk of a double dip recession. However, it is the pace of recovery that could be lower than anticipated, and thus it is important to remain constantly vigilant.

On the domestic front, it is widely anticipated that the rural growth story is losing steam, and as such, is likely to offer limited upside to growth in FY 2015-16. Moreover, the possibility of El Nino continues to pose a risk to rural growth. While, we expect average CPI inflation to decline in FY 2015-16, development of El Nino could potentially raise the downside risk to growth, and increase the upside risk to inflation. In such a scenario, revival of external demand, and recovery in the capex cycle would have to play a key role in driving the economy ahead.

Beside these, domestic issues like weak monsoon, inflation pressure and tightening of status quo on rate tightening by RBI, pose a challenge to the economic activities, thus affecting the Indian Economy.

The business of the Company is dependent on the international and domestic economic conditions. Global factors like geopolitical tension, economic slowdown are a potential risk to the company's performance. Further increase in competition among the financial market intermediaries is a concern and this can impact the performance of the company.

INTERNAL CONTROL SYSTEMS

The Company has in place adequate internal control system Commensurate with its requirements and the size of its business.

The overall Operational Performance both at Stand alone and also at Consolidated level has improved significantly in terms of reduction in Employment cost, Total cost as well as financial cost resulting in reductions in Long term borrowings and other long term liabilities of the Company and the Group as a whole.
